

MIS Full Form

MIS = Management Information System

An MIS Executive is a person who collects business data, organizes it, analyzes it, and creates reports for management.

Simply:

👉 **Management = Company managers, owners, team leaders**

👉 **Information = Business data (sales, leads, revenue, attendance, expenses)**

👉 **System = Organized method/software to manage data**

So,

MIS Executive = Person who converts raw business data into useful reports for management.

Example

Imagine a Travel Agency.

Every day:

- 100 enquiries come
- 15 bookings happen
- Revenue = ₹50,000

Raw data:

Name	Source	Status
Ravi	WhatsApp	Interested

Kumar Website Booked

Priya Facebook Follow-up

Manager doesn't want to read 100 rows.

MIS Executive prepares:

Metric	Value
Total Leads	100
Bookings	15
Revenue	₹50,000
Conversion Rate	15%

Now management can understand business in 10 seconds.

Main Responsibilities

1. Data Collection

Download data from:

- CRM
 - ERP
 - Sales Software
 - Attendance Software
 - Google Sheets
-

2. Data Cleaning

Example:

Wrong Data:

Name

Ravi

ravi

RAVI

MIS Executive corrects it.

3. Report Creation

Examples:

- Daily Sales Report
 - Weekly Lead Report
 - Monthly Revenue Report
 - Attendance Report
-

4. Dashboard Creation

Using:

- Excel
- Google Sheets
- Power BI

Example Dashboard:

KPI	Value
Leads	500
Sales	₹10 Lakh
Revenue	₹25 Lakh

5. Email Reporting

Every day:

"Dear Sir,

Today's Sales: ₹1,25,000

Leads Generated: 150

Conversion Rate: 12%

Regards,

MIS Team"

Skills Required

Skill	Importance
Excel	Very High
Pivot Tables	Very High
XLOOKUP/VLOOKUP	High
Charts	High
Google Sheets	High
Power BI	Medium
SQL	Medium

Career Growth

Position	Salary (India)
MIS Executive	₹20k–40k
Senior MIS Executive	₹35k–60k
MIS Analyst	₹40k–80k
Reporting Analyst	₹50k–1L+

Easy Definition

If someone asks:

"What is an MIS Executive?"

You can answer:

"An MIS Executive collects business data from different software systems, prepares Excel reports and dashboards, and provides management with accurate information to support business decisions."

This is one of the best non-coding office jobs for people who are strong in Excel, reporting, and data organization.

=====

My suggestion for your profile

Apply in this order:

1. **MIS Executive / Reporting Executive**
2. **US Healthcare Claims Processing**
3. **Insurance Verification**
4. **Operations Executive**
5. **Chat/Email Support**
6. **Data Analyst**

The combination of **19 years business experience + fast typing + Excel/reporting skills + willingness for night shifts** gives you a better chance in operations, MIS, and healthcare-process roles than competing directly against thousands of fresh Data Analyst applicants.

=====

MIS Executive / Reporting Executive is actually one of the best targets for your profile right now.

Why It Fits You

You already have:

- ✓ 19 years of business experience
- ✓ Fast English typing
- ✓ Computer knowledge
- ✓ Learning Data Analytics
- ✓ Excel exposure
- ✓ Working from home setup

Compared to Data Analyst jobs, MIS jobs usually have:

- Lower entry barriers
 - More openings
 - Faster hiring
 - More acceptance of experienced professionals
-

What an MIS Executive Does

Daily work typically includes:

- Updating Excel reports
- Preparing daily MIS reports
- Maintaining data records
- Creating Pivot Tables
- VLOOKUP/XLOOKUP
- Sending reports to management
- Tracking sales/operations performance
- Updating Google Sheets

Example:

Date	Lead	Sale	Revenu
	s	s	e

30-May 120 15 ₹45,000

Management wants this every day.

The MIS Executive prepares and shares it.

Skills You Should Learn

Must Have

- Excel
- Pivot Tables
- VLOOKUP
- XLOOKUP
- IF Formula
- Conditional Formatting
- Charts

Good To Have

- Power BI
 - SQL Basics
 - Google Sheets
-

Salary Range

Experience Level	Salary
Entry	₹20k–30k
Good Excel	₹30k–45k
MIS + Power BI	₹40k–60k
Reporting Analyst	₹50k–80k

Keywords To Search

Search these exact terms on job portals:

- "Remote MIS Executive"
 - "Work From Home MIS Executive"
 - "MIS Analyst"
 - "Reporting Executive"
 - "Reporting Analyst"
 - "Excel Analyst"
 - "Business Reporting Executive"
 - "Operations Reporting Analyst"
 - "Remote Operations Executive"
-

Resume Title

Instead of:

 Data Science Fresher

Use:

 MIS Executive | Reporting Analyst | Excel & Power BI Enthusiast

or

 Business Operations Professional Transitioning into MIS & Data Analytics

This uses your 19 years of experience as a strength rather than hiding it.

Next 30 Days Learning Plan

Week 1:

- Pivot Tables
- VLOOKUP
- XLOOKUP

Week 2:

- Dashboards in Excel

Week 3:

- Power BI Dashboard

Week 4:

- SQL Basics

At the same time:

- Continue **Iniyan AI Creatives**
- Send 25–50 business WhatsApp messages daily
- Apply to 10 MIS/Reporting jobs daily

If you upload your current resume, I can tell you exactly:

1. Whether you can realistically apply for MIS Executive today.
2. What changes are needed.
3. What salary range to expect.
4. Whether your resume is ATS-friendly for remote MIS jobs.

=====

For your profile, I would focus mainly on **India-based companies serving US/UK clients**, because:

- Easier hiring process
- Night shifts available
- Remote/hybrid options available
- Your experience can be considered
- No visa needed

Direct US-company remote hiring is possible later, but usually after gaining experience.

Best Countries To Target

1. 🇺🇸 USA Process (Best Option)

Work from India during US night shift.

Roles:

- MIS Executive
- Reporting Executive
- Operations Analyst

- Claims Processing
- Insurance Verification
- Healthcare RCM

2. UK Process

Shift usually:

- 1:30 PM – 10:30 PM
- 3:00 PM – 12:00 AM

Better for work-life balance.

3. Australia Process

Early morning shifts.

Less suitable since you specifically want night-shift opportunities.

Companies I Would Target First

US Healthcare + Operations

- [Access Healthcare](#)
- Guidehouse Careers
- NTT DATA Careers
- [HCLTech Careers](#)
- [athenahealth Careers](#)

These regularly hire healthcare operations, reporting, and process executives.

MIS / Reporting / Operations

- [DP World Careers](#)
- TVS Credit Careers
- [Aditya Birla Group Careers](#)
- [ABB Careers](#)
- PhysicsWallah Careers

MIS Analyst and reporting-related openings are actively listed in these categories.

Remote Job Platforms

Apply daily through:

- [LinkedIn Jobs](#)
- [Naukri.com](#)
- [Foundit](#)
- [Indeed India](#)

Remote MIS and analyst openings are continuously listed there.

Search Keywords To Use

Copy these exactly:

- Remote MIS Executive
 - Work From Home MIS Executive
 - Night Shift MIS Executive
 - Reporting Executive Remote
 - Reporting Analyst Remote
 - Operations Analyst Night Shift
 - US Shift Reporting Analyst
 - Excel MIS Executive
 - Remote Operations Executive
 - Remote Back Office Analyst
-

Night Shift Availability?

Yes.

Many night-shift roles exist in:

Role	Night Shift
MIS Executive	Sometimes
Reporting Executive	Yes
Operations Analyst	Yes
US Healthcare Process	Very Common
Claims Processing	Very Common
Insurance Verification	Very Common
Back Office Operations	Common

US healthcare and US operations processes are where night shifts are most common.

What I would do if I were in your position

For the next 30 days:

Business (Daytime)

- Iniyen AI Creatives
- Travel agency outreach
- Real-estate outreach

Jobs (Evening/Night Applications)

- 4 US Healthcare jobs
- 3 MIS Executive jobs
- 2 Reporting Analyst jobs
- 1 Data Analyst job

every day.

That combination gives you the highest probability of getting either:

- a recurring client income, or
- a remote/night-shift salary income,

without depending on only one path.

=====

Professional Profile

Business and Operations Professional with **19 years of experience** in customer service, business operations, sales coordination, and process management. Currently transitioning into **Data Analytics, MIS Reporting, and Digital Business Services** while building **Iniyan AI Creatives**, a freelance digital marketing and creative services venture.

Hands-on experience in:

- Business operations and administration
- Client communication and relationship management
- Digital poster design for travel and real estate businesses
- Website creation and digital visiting cards
- Data analysis learning using Excel, SQL, Power BI, Python, and AI tools
- Fast English typing and computer proficiency

Seeking:

- Remote or night-shift opportunities in MIS, Reporting, Operations, Healthcare Process, Data Processing, or Business Support roles.
- Simultaneously building a client base for digital creative and website services.

Key Skills

Business & Operations

- Business Operations
- Process Coordination
- Client Relationship Management
- Sales Support
- Documentation

Data & Reporting

- Microsoft Excel
- Pivot Tables
- VLOOKUP / XLOOKUP
- Google Sheets
- Power BI (Learning)
- SQL (Learning)
- Python (Learning)
- Data Analytics

Digital Services

- Social Media Poster Design
- Digital Visiting Cards
- Business Websites
- AI-Assisted Content Creation
- Canva

Additional Strengths

- Fast English Typing
- Remote Work Readiness
- Self-Learning Ability
- Entrepreneurial Mindset
- Strong Communication Skills

Target Roles

1. MIS Executive
2. Reporting Executive
3. MIS Analyst
4. Operations Executive
5. Operations Analyst
6. Business Support Executive
7. Healthcare Claims Processing Executive
8. Insurance Verification Executive
9. Revenue Cycle Management (RCM) Executive
10. Junior Data Analyst

Career Objective

To leverage 19 years of business and operational experience, combined with emerging skills in data analytics and digital services, to contribute effectively in a remote or night-shift role while continuing to develop expertise in reporting, analytics, and business process improvement.

This positioning is stronger than presenting yourself as a "Data Science Fresher" because it highlights your substantial experience while showing your transition into analytics and technology.

=====

getting a remote night-shift job quickly, the answer is No.

Your AI/ML/Deep Learning studies are valuable, but they are **not the fastest path to employment** compared to Excel, Power BI, SQL, and MIS reporting skills.

Think of it this way:

Skill	Time to Learn	Time to Get Job	Number of Jobs
Excel + MIS	Low	Fast	Very High
Power BI	Medium	Fast	High
SQL	Medium	Fast	High
AI / ML	High	Slower	Lower
Deep Learning	Very High	Much Slower	Much Lower

=====

Why?

A company can hire an MIS Executive tomorrow if the person can:

- Handle Excel reports
- Create dashboards
- Send management reports
- Work night shifts

But for AI/ML roles, companies usually expect:

- Strong Python
- Statistics
- Projects
- Model deployment
- Real-world experience
- Sometimes engineering or analytics background

Your AI Learning Is NOT Wasted

What you've learned gives you advantages:

- ✓ Better understanding of data

- ✓ Better problem-solving ability
- ✓ Ability to use AI tools productively
- ✓ Future growth into analytics
- ✓ Stronger profile than a typical MIS Executive

So don't throw it away.

What I Would Do

Short-term (Income):

- Excel
- Power BI
- SQL
- MIS / Reporting jobs
- US Healthcare operations jobs

Long-term (Career Growth):

- Continue AI/ML learning gradually
- Build projects
- Use AI in your business (Iniyan AI Creatives)

Your Position Today

You are not:

✗ A pure Data Scientist

You are closer to:

- ✓ Business Operations Professional
- +
- ✓ Digital Creative Entrepreneur
- +
- ✓ Aspiring Data & AI Professional

That combination can earn money much faster than waiting for an AI Engineer role.

Suggested Split

For the next 90 days:

- 60%: Client acquisition for Iniyan AI Creatives
- 25%: Excel + Power BI + SQL
- 15%: AI/ML practice and projects

That way, you're building income now while keeping the AI path open for the future.

=====

For Your Situation

You are simultaneously:

- Building Iniyan AI Creatives
- Sending WhatsApp outreach
- Applying for jobs

So I would **not** recommend 6–8 hours of study daily.

Recommended Daily Schedule

Morning

- 1 hour: Lead generation
- 1 hour: Client work / portfolio

Afternoon

- 2 hours: Excel / Power BI / SQL learning

Evening

- 1 hour: WhatsApp outreach

Night

- 30–45 min: Job applications

Total learning:

2 hours/day

Learning Order

Week 1–2

Excel

- Pivot Table
- XLOOKUP
- VLOOKUP
- IF
- SUMIFS
- Dashboard

Week 3–5

Power BI

- Import Data
- Data Cleaning
- Dashboard Creation
- DAX Basics

Week 6–7

SQL

- SELECT
- WHERE
- GROUP BY
- ORDER BY
- JOIN

Week 8

MIS Reporting Projects

- Sales Report
- Lead Tracking Report
- Business Dashboard

Important

Don't stop your AI learning completely.

Use this split:

- **70% Time** → Excel + Power BI + SQL

- **20% Time** → Client acquisition (Iniyan AI Creatives)
- **10% Time** → AI/ML revision

Why?

Because **Excel + Power BI + SQL can get you a job faster**, while your AI knowledge becomes a bonus that helps you grow later into Reporting Analyst, Business Analyst, or Data Analyst roles.

Given your 19 years of business experience, I believe **MIS Executive → Reporting Analyst → Data**

=====

That's exactly why you should **not put skills on your resume that you cannot discuss at all.**

If an interviewer asks:

"Do you know Power BI?"

Don't say:

✗ "Yes, expert."

If you've only started learning.

Instead say:

✓ "I am currently learning Power BI and have completed basic dashboard creation. My stronger skills today are business operations, Excel, reporting, and client coordination. I am actively upgrading my Power BI and SQL skills."

That is honest and professional.

Example Interview

Interviewer: Do you know SQL?

Bad answer:

Yes.

Then they ask:

What is JOIN?

You get stuck.

Good answer:

I am currently learning SQL. I am comfortable with basic SELECT, WHERE, and filtering concepts and am continuing to build my SQL skills.

What Should You Put on Your Resume?

Today

If you know these:

- Excel (Basic/Intermediate)
- AI & Data Science Coursework
- Canva
- Website Creation
- Business Operations
- Fast Typing

Then list those.

After Learning

Add:

- Power BI
 - SQL
 - Advanced Excel
-

What If Interview Comes Next Week?

That is actually good.

You may not get selected.

But you'll learn:

- What questions they ask
- Which skills are in demand
- What salary range they offer

Many people need 3–5 interviews before they become comfortable.

For Your Situation

Apply immediately to:

- MIS Executive
- Reporting Executive
- Operations Executive
- Healthcare Process Jobs

But avoid claiming:

- Expert Power BI
- Expert SQL
- Expert Data Analyst

until you can demonstrate those skills.

Remember

With your profile, many employers will be more interested in:

- 19 years of business experience
- Communication
- Reliability
- Reporting ability
- Excel skills
- Night-shift willingness

than whether you know every Power BI feature.

So start applying now, keep learning daily, and answer honestly:

"I am currently upgrading my Excel, Power BI, and SQL skills while transitioning into MIS and reporting roles."

That's a much better impression than pretending to know something and getting caught during the interview.

=====

In that case, your approach is completely reasonable.

You are not in a situation where you must get a job next week. You already have:

- Iniyar AI Creatives
- Travel agency outreach
- Real estate poster work experience
- Website creation experience
- AI/Data Science learning background

So you can spend the next **8–12 weeks building confidence first.**

What I Would Do

June

Learn:

- Advanced Excel
- Google Sheets
- Reporting concepts

Build:

- Sales Dashboard
- Lead Tracking Dashboard

July

Learn:

- Power BI

Build:

- Travel Agency Dashboard
- Real Estate Dashboard

August

Learn:

- SQL

Build:

- SQL practice projects
- Reporting portfolio

At the same time:

- Continue WhatsApp outreach
- Continue building Iniyan AI Creatives
- Try to get 1–2 recurring clients

Then Start Applying

When you can confidently answer:

- ✓ What is a Pivot Table?
- ✓ Difference between VLOOKUP and XLOOKUP?
- ✓ How do you create a dashboard?
- ✓ What is Power BI?
- ✓ What is a SQL JOIN?
- ✓ How do you prepare a daily MIS report?

Then start applying seriously.

Your Advantage

Many candidates:

- Learn Excel
- Learn Power BI
- Learn SQL

But have little business experience.

You will have:

- 19 years business experience
- Client handling experience
- Entrepreneurial experience
- Excel
- Power BI
- SQL
- AI/ML knowledge
- Website and digital marketing experience

That combination is stronger than a typical fresher profile.

Suggested Timeline

Next 60–90 Days

- Focus on learning Excel, Power BI, SQL.
- Build 3–5 portfolio projects.
- Grow Iniyan AI Creatives.
- No pressure to apply immediately.

After 90 Days

Apply for:

- MIS Executive
- Reporting Executive
- MIS Analyst
- Operations Analyst
- Reporting Analyst
- Remote US/UK support operations roles
- Selected Data Analyst roles

By then, you'll be walking into interviews with much more confidence and practical examples to discuss, rather than learning under pressure.

=====

I would **not create a new LinkedIn account**.

A LinkedIn profile becomes stronger when it shows a journey:

- Business experience (19 years)
- AI/ML learning
- Projects completed
- Website projects
- Travel marketing work
- MIS/Reporting learning

That tells a story of growth.

Creating a brand-new LinkedIn means:

- 0 connections
- 0 history
- 0 recommendations
- 0 project history

You lose all the AI/ML work you've already posted.

What I Would Do Instead

Keep your existing LinkedIn.

Gradually add new content:

June

- Excel Dashboard Project
- Lead Tracking Dashboard
- MIS Reporting Learning

July

- Power BI Dashboard
- Reporting Analytics Project

August

- SQL Project
- MIS Portfolio

Now recruiters can see:

- AI/ML projects
- Excel projects
- Power BI projects
- Business experience

That's actually stronger than a pure MIS profile.

Email

For email, you have two options:

Option 1 (Recommended)

Keep:

 sugumarranganthan@gmail.com

Use it for:

- LinkedIn
- Naukri
- Jobs

- Learning platforms

Option 2

Create a dedicated career email:

Examples:

- sugumar.analytics@gmail.com
- sugumar.reporting@gmail.com
- sugumar.mis@gmail.com

But this is optional, not required.

My Recommendation for You

Keep your current LinkedIn.

Do not start from zero.

Instead, change your headline over time:

Today

Business Operations Professional | AI & Data Analytics Learner

After June

Business Operations Professional | Excel & MIS Reporting Learner

After July

MIS Reporting | Power BI | Business Operations

After August

MIS Executive | Reporting Analyst | Excel | Power BI | SQL | Business Operations

This lets your profile evolve naturally and preserves all the effort you've already invested in AI/ML projects.

=====

Keep Existing LinkedIn

Your current LinkedIn already has:

- AI projects
- Machine Learning projects
- Deep Learning learning journey
- Existing connections
- Existing posts

Don't throw away that history.

Instead, add new posts later:

- Excel Dashboard Project
- MIS Reporting Project
- Power BI Dashboard
- SQL Project

This will show career growth.

Create New Gmail for MIS/Reporting

Examples:

- sugumar.mis@gmail.com
- sugumar.reporting@gmail.com
- sugumar.analytics@gmail.com
- sugumar.powerbi@gmail.com

Use for:

- GitHub
 - Power BI
 - Resume
 - Job applications
 - Portfolio
-

Create New GitHub for MIS/Reporting

Example usernames:

- sugumar-mis
- sugumar-reporting
- sugumar-powerbi
- sugumar-analytics

Purpose:

- Excel Projects
 - Power BI Projects
 - SQL Projects
 - MIS Portfolio
-

Your Professional Structure

Business Side

Iniyan AI Creatives

- Travel posters
- Real estate posters
- Websites
- Digital marketing

Career Side

MIS / Reporting Portfolio

- Excel
- Power BI
- SQL
- Reporting dashboards

Both can exist together.

June 1 Setup Checklist

☒ Create Gmail

☒ Create GitHub

☒ Create folder:

MIS-Reporting-Portfolio/

- Excel-Projects
- PowerBI-Projects
- SQL-Projects
- Resume
- Certificates
- Dashboard-Screenshots

✅ Start Excel Day 1

One More Suggestion

For the GitHub username, choose something broad like:

sugumar-analytics

instead of:

sugumar-mis

Why?

Today: MIS Executive

Tomorrow: Reporting Analyst

Later: Data Analyst

Eventually: Business Analyst

"Analytics" covers all of these and gives you room to grow without needing another account later.

=====

Keep Existing LinkedIn ✅

Your current LinkedIn already has:

- AI projects
- Machine Learning projects
- Deep Learning learning journey
- Existing connections
- Existing posts

Don't throw away that history.

Instead, add new posts later:

- Excel Dashboard Project
- MIS Reporting Project
- Power BI Dashboard
- SQL Project

This will show career growth.

=====

MIS-Reporting-Portfolio/

- Excel-Projects
- PowerBI-Projects
- SQL-Projects
- Resume
- Certificates
- Dashboard-Screenshots

=====

An MIS Executive usually **does not manually enter all data**. Instead, they **download data from different software systems**, combine it in Excel, clean it, and create reports.

1. CRM Data (Customer Relationship Management)

Example: Leads coming from Website, WhatsApp, Facebook Ads.

Raw CRM Export

Lead ID	Name	Mobile	Source	Status
---------	------	--------	--------	--------

L001	Kumar	9876543210	Website	New
------	-------	------------	---------	-----

L002	Ravi	9876543211	Facebook	
------	------	------------	----------	--

Qualified

L003	Priya	9876543212	WhatsApp	
------	-------	------------	----------	--

Converted

—

MIS Report

Source	Leads
--------	-------

Website	100
---------	-----

Facebook	80
----------	----

WhatsApp	50
----------	----

Management asks:

👉 Which source gives more leads?

👉 Which source gives more sales?

=====

2. ERP Data (Enterprise Resource Planning)

ERP stores business transactions.

Examples:

- Purchase
- Sales
- Inventory
- Billing

Raw ERP Export

Raw ERP Export

Invoice No	Customer	Amount
INV001	ABC Ltd	₹25,000
INV002	XYZ Ltd	₹40,000
INV003	PQR Ltd	₹15,000

MIS Report

Month	Revenue
April	₹5,00,000
May	₹7,50,000
June	₹6,20,000

Management asks:

👉 Is revenue increasing?

👉 Which customer gives highest revenue?

=====

3. Sales Software Data

Sales team updates their daily sales.

Raw Data

Sales Person	Sales
Ravi	₹1,20,000
Kumar	₹90,000
Priya	₹1,50,000

=====

MIS Dashboard

Sales Person	Target	Achieved
Ravi	₹1,00,000	120%
Kumar	₹1,00,000	90%
Priya	₹1,00,000	150%

Management asks:

👉 Who is top performer?

👉 Who missed target?

=====

4. Attendance Software Data

HR department exports attendance.

Raw Attendance Export

Employee	Days Present
Ravi	25
Kumar	22
Priya	27

====

MIS Report

Department	Attendance %
Sales	95%
HR	98%
Operations	92%

Management asks:

👉 Which department has poor attendance?

=====

Real MIS Executive Example

Imagine you join a travel company.

Morning 9 AM:

You download:

CRM Data

Lead Source	Leads
Website	50
WhatsApp	30
Facebook	20

Sales Data

Sales	Amount
Package Sales	₹3,50,000

Attendance Data

Staff Present
18 / 20

Then you create one report:

Metric	Today
--------	-------

Total Leads 100

Sales ₹3,50,000

Conversion 12%

Attendance 90%

Send this to the manager by email.

That's a typical MIS Executive's daily work.

In your own travel marketing project

You already have something similar:

- Travel agency contact list
- WhatsApp messages sent
- Replies received
- Interested agencies
- Converted agencies

If you put all this into Excel and make a daily report, you are actually doing a basic MIS report already. The difference is that companies use CRM/ERP software and larger datasets (hundreds or thousands of rows).

=====
