

Extensions Menu

Option	Purpose
Add-ons	Install extra tools
Macros	Record repeated actions
Apps Script	Automation using code
AppSheet	Create apps without coding
Data Studio	Create dashboards and reports

=====

1. Macros

What is a Macro?

A Macro records your actions and repeats them automatically.

Without Macro

Every day:

1. Bold heading
2. Apply border
3. Apply currency format
4. Center align

You repeat these steps manually.

With Macro

1. Record once.
2. Save Macro.
3. Run Macro.

Google Sheets performs all actions automatically.

Example

Suppose every MIS report needs:

Bold Header

Border

Currency Format

Macro does everything in one click.

=====

2. Apps Script

What is Apps Script?

Apps Script allows you to automate Google Sheets using JavaScript.

Example

Without Apps Script:

Create PDF

Send Email

Update Sheet

Manually.

With Apps Script

Click one button.

Automatically:

Create PDF
Send Email
Update Sheet

=====

2. Apps Script

What is Apps Script?

Apps Script allows you to automate Google Sheets using JavaScript.

Example

Without Apps Script:

Create PDF
Send Email
Update Sheet

Manually.

With Apps Script

Click one button.

Automatically:

Create PDF
Send Email
Update Sheet

=====

4. Data Studio

(Currently called **Looker Studio**)

What is Data Studio?

Creates professional dashboards and reports.

Example Data

Month	Sales
Jan	10000
Feb	15000
Mar	12000

Data Studio creates:

 Charts

 Trends

 Dashboards

Automatically.

Real MIS Example

Manager sees:

Total Sales
Top Employee
Monthly Growth

in a dashboard.

Easy Summary

Tool	Think Of It As
Add-ons	Install extra features
Macros	Record & repeat actions
Apps Script	Automation with code
AppSheet	Create apps from Sheets
Data Studio	Create dashboards from Sheets
