

Mail Merge Add-on – Step by Step Example

Step 1: Create Employee Data

In Google Sheets:

Name	Email
Ravi	ravi@gmail.com
Kumar	kumar@gmail.com
Priya	priya@gmail.com

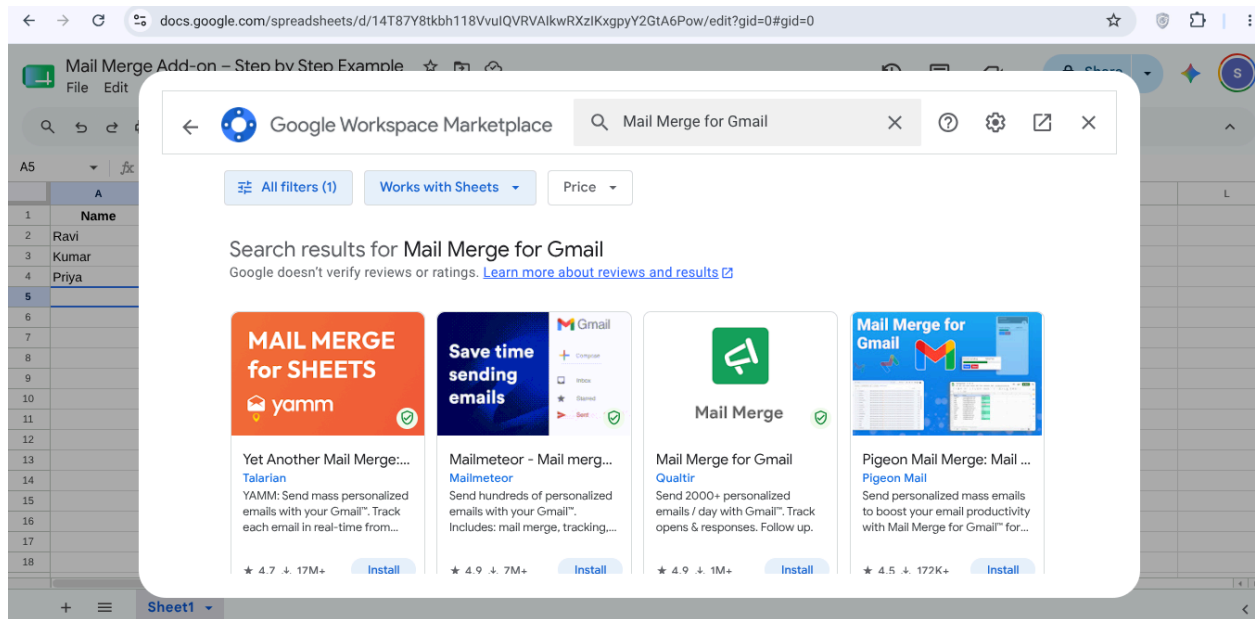

Step 2: Install Mail Merge Add-on

1. Click **Extensions**
2. Click **Add-ons**
3. Click **Get add-ons**
4. Search:

Mail Merge

5. Install a Mail Merge add-on.

Name	Email
Ravi	ravi@gmail.com
Kumar	kumar@gmail.com
Priya	priya@gmail.com

Your screenshot shows that you successfully reached the **Google Workspace Marketplace** and searched for **Mail Merge**.

You have completed:

- ✓ Extensions → Add-ons → Get add-ons
- ✓ Search for Mail Merge

What to Do Next (Learning Purpose Only)

Don't install anything yet.

Just click on one result, for example:

Mail Merge

or

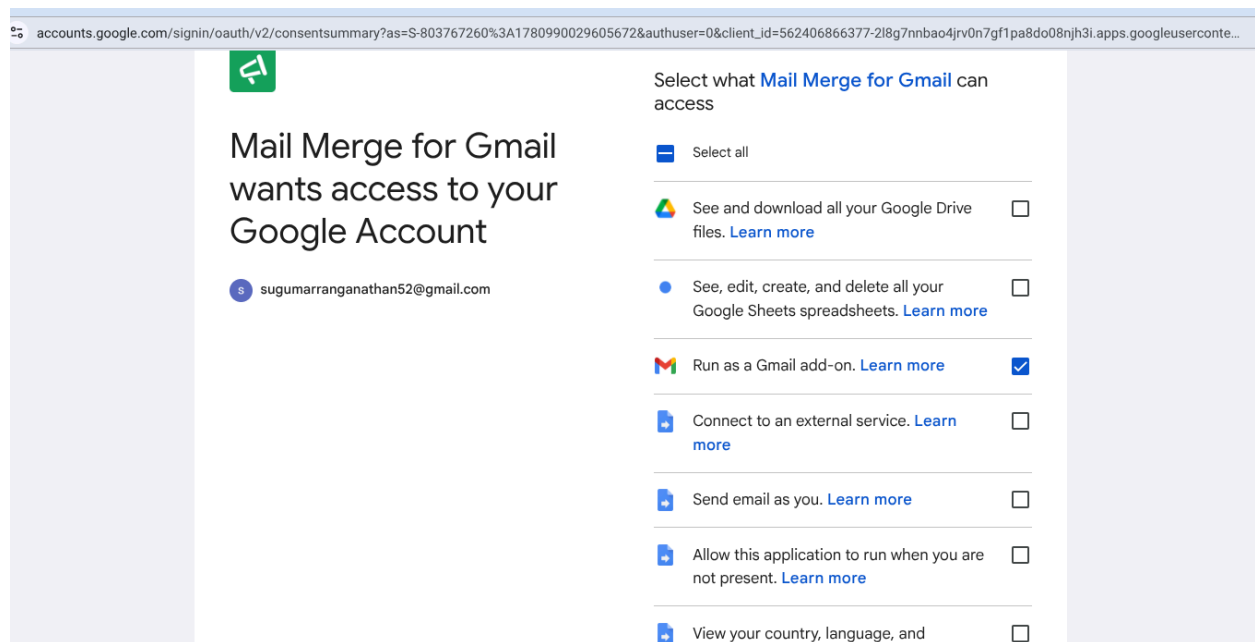

Mailmeteor – Mail merge for Gmail

Observe These Details

When the add-on page opens, look for:

Item	Meaning
Install	Adds the tool to Google Sheets
Rating	User reviews
Description	What the add-on does
Works with	Gmail, Sheets, Docs, etc.
Developer	Who created it

=====

Continue and granted all required permissions, this is what would typically happen.

Step 1: Installation Completes

You would see a message like:

Mail Merge for Gmail installed successfully

Step 2: Return to Google Sheets

Menu would show:

Extensions

Mail Merge for Gmail

Example:

Extensions → Mail Merge for Gmail → Open

Step 3: Create Test Data

Name

Email

Test User yourgmail@gmail.com

Step 4: Open Mail Merge

A sidebar would open on the right side of the sheet.

Something similar to:

Mail Merge Setup

Subject:

Message:

Recipient Column:

Send Test Email

Step 5: Create Email

Subject:

Mail Merge Test

Message:

Hello {{Name}},

This is a test email.

Thank you.

Step 6: Send Test Email

Click:

Send Test Email

or

Send

Step 7: Check Gmail

Inbox:

From: Your Gmail

To: Your Gmail

Subject: Mail Merge Test

Hello Test User,

This is a test email.

Thank you.

Step 8: Check Sent Folder

Gmail → Sent

You would see:

Mail Merge Test

showing that the email was sent.

What You Learn

Permission	Why It Is Needed
Google Sheets	Read Name and Email columns
Send email as you	Send mail from your Gmail
Gmail Add-on	Integrate with Gmail
Drive Access	Read attachments/templates

Real-World Use Case

Suppose you have:

Name	Email
Ravi	ravi@gmail.com

Kumar kumar@gmail.com

Priya priya@gmail.com

—

Template:

Hello {{Name}},

Your salary slip is ready.

Mail Merge automatically sends:

- Hello Ravi → ravi@gmail.com
- Hello Kumar → kumar@gmail.com
- Hello Priya → priya@gmail.com

without manually sending three separate emails.

So if you had granted permission, the visible result would be:

- ✓ Add-on installed
- ✓ New menu under Extensions
- ✓ Mail Merge sidebar opens
- ✓ Test email arrives in your inbox
- ✓ Email appears in Gmail Sent folder
