Career Path Most Suitable for You

Current Strengths

Strength	Reason
MBA	Strong business foundation
19 Years Experience	Significant industry exposure
AI Knowledge	Ahead of many traditional analysts
Business Analysis	Existing professional background
Self-Learning	Consistent upskilling
Project Portfolio	Practical implementation experience

Overall Professional Summary

MBA graduate with approximately 19 years of Business Analyst experience, currently transitioning into AI, Machine Learning, Deep Learning, Data Analytics, and Business Automation. Experienced in business processes and now building technical expertise through Python, ML, Deep Learning, GitHub projects, Streamlit applications, and AI tools. The most suitable future path is Data Analytics and AI-enabled Business Analysis rather than entry-level technical roles.
