

Day 1 – Ribbon (Google Sheets Menu Bar)

What is a Ribbon?

A **Ribbon** is the collection of menus and tools at the top of the spreadsheet used to perform different tasks.

In Google Sheets, the Ribbon equivalent is:

In Google Sheets, the Ribbon equivalent is:

The screenshot shows the Google Sheets interface with several annotations:

- Spreadsheet heading:** Points to the title "Recruitment profiles" at the top left.
- Menu bar:** Points to the menu bar containing File, Edit, View, Insert, Format, Data, Tools, Extensions, and Help.
- Formula bar:** Points to the formula bar area, which includes a dropdown menu and a text input field.
- Share settings:** Points to the share icon (person with a plus sign) in the top right corner.
- Columns:** Points to the column headers A, B, C, D, E, and F.
- Rows:** Points to the row numbers 1 through 12.
- Add sheet:** Points to the "+" button in the bottom left corner.
- Explore:** Points to the "Explore" button in the bottom right corner.

Name:	Stage:	Current role:	Number of meetings:	Expected salary:

The menus are:

File | Edit | View | Insert | Format | Data | Tools | Extensions | Help

=====

Step 1: File Menu

Click:

File

Observe options:

Option	Purpose
--------	---------

New Create new sheet

Open Open existing file

Make a copy Duplicate sheet

Download Save as
Excel/PDF

Share Share with others

Print Print spreadsheet

=====

Step 2: Edit Menu

Click:

Edit

Observe:

Click:

Edit

Observe:

|

Option	Purpose
Undo	Reverse last action
Redo	Repeat action
Cut	Remove and move
Copy	Copy data
Paste	Paste data
Find and Replace	Search text

—

Practice

1. Type any word in a cell.
2. Copy it.
3. Paste it elsewhere.
4. Try Undo (Ctrl+Z).

=====

Step 4: Insert Menu

Click:

Insert

Observe:

Option	Purpose
Row	Insert row
Column	Insert column

Chart	Create chart
Image	Insert image
Checkbox	Add checkbox

—

Practice

1. Insert a new row.
2. Insert a new column.

=====

Step 5: Format Menu

Click:

Format

Observe:

Option	Purpose
Number	Number/Date formatting
Text	Bold, Italic
Alignment	Left, Center, Right
Wrapping	Text wrapping
Conditional Formatting	Highlight data

=====

Practice

1. Bold a cell.
2. Change a number to Currency.

=====

Step 6: Data Menu

Click:

Data

Observe:

Option	Purpose
Sort Sheet	Sort data
Create Filter	Filter records
Data Validation	Create dropdowns

=====

Practice

1. Click **Data** → **Create Filter**.
2. Observe the filter icons.

=====

Practice

1. Click Data → Create Filter.
2. Observe the filter icons.

=====

What is a Filter?

Imagine you have this data:

Name	Department
Ravi	HR
Kumar	IT
Priya	HR
Arjun	Sales

Suppose you want to see only HR employees.

Instead of deleting other rows, you use a Filter.

The screenshot shows a Google Sheets interface with a spreadsheet titled "Untitled spreadsheet". The menu bar includes File, Edit, View, Insert, Format, Data, Tools, Extensions, and Help. The Data menu is open, displaying options such as Sort sheet, Sort range, Remove filter, Create group by view, Create filter view, Save as filter view, Add a slicer, Protect sheets and ranges, Named ranges, Named functions, Randomize range, Column stats, Data validation, and Data cleanup. The spreadsheet contains a table with two columns: "Name" and "Department". The data rows are as follows:

	A	B
1	Name	Department
2	Ravi	HR
3	Kumar	IT
4	Priya	HR
5	Arjun	Sales

Step-by-Step Practice

Step 1: Create Data

Enter this in Google Sheets:

Step 2: Select the Table

Drag and select:

A1:B5

The entire table should be highlighted.

Step 3: Click Data

At the top menu:

File | Edit | View | Insert | Format | Data

Click Data.

Step 4: Click "Create a Filter"

Choose:

Data → Create a Filter

Step 5: Observe the Change

You will see small ▼ icons appear in the header row:

Name ▼	Department ▼
--------	--------------

Ravi	HR
------	----

Kumar	IT
-------	----

Priya	HR
-------	----

Arjun	Sales
-------	-------

—

Step 6: Filter HR Employees

1. Click the ▼ next to Department.
2. Uncheck Select All.
3. Check only HR.
4. Click OK or Apply.

Result:

	A	B
1	Name	Department
2	Ravi	HR
4	Priya	HR

Only HR employees are visible.

Why is this useful?

In MIS reports, you may have:

- 5,000 employees
- 10,000 sales records
- 50,000 transactions

Filter helps you quickly see only the records you want.

=====

Step 7: Tools Menu

Click:

Tools

Observe:

Option

Purpose

Spelling	Check spelling
Notification Rules	Alerts
Script Editor	Automation

Practice

Just open and explore.

=====

Step 8: Extensions Menu

Click:

Extensions

Purpose

Used to install add-ons and automate tasks.

Examples:

- **Mail merge**
- **PDF generators**
- **Data connectors**

Just view the menu.

The Extensions menu is used to install add-ons and automate tasks using Apps Script. It helps extend the functionality of Google Sheets.

=====

What You See in Your Screenshot

Option 1: Add-ons

When you click:

Extensions → Add-ons

Google allows you to install additional tools.

Examples:

Add-on	Purpose
Mail Merge	Send emails from Sheets
PDF Generator	Create PDFs automatically
QR Code Generator	Create QR codes
Form Publisher	Generate documents

Real Example

Suppose you have:

Name	Email
Ravi	ravi@gmail.com
Kumar	kumar@gmail.com

A Mail Merge add-on can send emails to all employees automatically.
