

Day 3 – Module 5: Absolute Reference (\$A\$1)

Step 1: Create This Table

A	B	C
Tax Rate	18%	
Amount	Tax	
1000		
2000		
3000		

Result

fx =A3*\$B\$1

A	B	C
Tax Rate	18%	
Amount	Tax	
1000	180	
2000	360	
3000	540	

$1000 * 18 = 18000 / 100 = 180$ is the tax

=====

What to Observe

Click:

- B3
- B4
- B5

Look at the formula bar.

You should see:

=A3*\$B\$1

=A4*\$B\$1

=A5*\$B\$1

Notice:

- A3 → A4 → A5 changes.
- \$B\$1 stays fixed.

That's the whole idea of an **Absolute Reference**.
